

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair! My wife and I are Seniors. The only reason we have a wireless phone is for safety and security while traveling. I do use the least expensive one I can find. Don't do this to us. We may have to take our phone out. It is almost too expensive now. You are talking about taking money from Amtrak. It is too expensive also at the present. We like other older Americans don't fly. You give money to the Airlines. Good for the Business traveler I guess.

Sincerely,
